CELf To Raise Awareness on Benefits of Natural Gas Vehicle

CELf Awarded Use of Natural Gas Vehicle. From left to right at New Castle Town Hall are: Barry Carr, VP-Alternative Fuels, Homeland Energy, Katie Ginsberg, Founder and Executive Director, CELf, Patti Bressman, CELf Board Member and Programming Director, Kim Larson, CELf Board Member, Sarah Hodder, CELf Board Member, New Castle Town Supervisor Barbara Gerrard.

The Children's Environmental Literacy Foundation (CELf) recently received the keys to the Honda's Civic GX natural gas vehicle. The honor comes in support and in celebration of the second anniversary of Energy Vision, now entering its third year, and its success in helping to replace hundreds of diesel-fueled trucks with cleaner, naturally produced, biomethane burning trucks in and around the Tri-State area and in Pennsylvania.

"We are especially pleased that the Children's Environmental Literacy Foundation was the winner of Energy Vision's year-end reception "door prize," three months' use of one of the true vehicles of the future," said Joanna Underwood, President of Energy Vision, a national non profit environmental organization that identifies and promotes the petroleum-free and renewable fuels for a sustainable transportation future.

CELf will use the specially designed Honda for three months in support of their work to help raise sustainability awareness and to promote hands-on planning and educational training within a broad number of K-12 communities interested in bringing together students, educators, parents, and other community leaders to help prepare today's students for tomorrow's world. Clean Energy and National Grid have pledged to cover the cost of all fuel over the three-month demonstration period.
